Attention: Ms. Emily Schmid, PM Team 25, Herbicide Branch Registration Division

Subject: **A21472 Plus VaporGrip® Technology (EPA Reg. No. 100-1623)**  
**Non PRIA: Submission of a Supplemental Label**  
**(SYT Reference AD111234)**

Dear Ms. Schmid:

Syngenta Crop Protection, LLC is herein submitting a supplemental label to EPA for A21472 Plus VaporGrip® Technology (EPA Reg. No. 100-1623; Alternate Brand Tavium® Plus VaporGrip® Technology). The state of Minnesota on 12/15/2021 imposed the following conditions restrictions for all dicamba product registrations for the 2022 growing season.

- Cutoff date: Do not apply south of interstate 94 after June 12. Do not apply north of interstate 94 after June 30.
- Cutoff Temperature: Do not apply if the air temperature of the field at the time of application is over 85 degrees Fahrenheit or if the National Weather Service's forecasted high temperature for the nearest available location for the day exceeds 85 degrees Fahrenheit. Forecasted temperature must be recorded at the start of the application.

Our intention is to provide this supplemental label to Minnesota users via Agrian, CDMS, and the Tavium tank mix website.

This information is being submitted as a fast track label amendment and therefore a PRIA category, fee, and timeline are not applicable. If there are any questions regarding the submission, please contact me at (919) 545-4986 or by email at [amy.mccaskill@syngenta.com](mailto:amy.mccaskill@syngenta.com) or our Regulatory Ops specialist Pat Eay [pat.eay@syngenta.com](mailto:pat.eay@syngenta.com) with any questions.

Kind Regards,

PII

Sr. Regulatory Manager, Herbicides
